

How does one say thank you to a company that has helped your own company expand enormously?

The ability of the team at Xtreme has allowed our company, FreeSpirit Holiday Parks Pty Ltd to operate smoothly across the entire country. We have a multi site business structure which extends all around Australia at present and is still growing. Our company manages some of Australia's best holiday parks for organisations such as NRMA Holiday Parks, Mirvac and Mariner Group. Xtreme's recommendation for the type of equipment and procedures to follow has been faultless. They have state of the art hosting facilities with the best back up and secure facility that could be offered anywhere in the world at present. Their persistence in the resolution of any problem has been without equal. The speed which our intranet operates is instant.

Through their team in website production, Xtreme has taken our websites for all our properties to amongst the best in our industry. Our "hits" on our websites are numbered in the multi thousands and growing each month. Our source of business as a direct result from our new websites is tracked and contributes to over 20% of our business income and is steadily growing. This is still within 12 months of establishing these sites. They listen carefully to identify our needs and work tirelessly to satisfy them.

To say simply "we recommend them" would be an injustice to their work ethic and ability. Our accolades and thanks are inadequate for the assistance and advice that they have extended. Xtreme is without doubt one of Australia's quiet achievers in the area of web site design and hosting.

Yvonne Bristow
Chief Operations Officer
